*“Due to the expansion policy of our company, ERP project was planned in Ukraine. We are using Microsoft Dynamics AX in headquarter. Therefore, we decided to use the same program in Ukraine.”*

Karani Yılmaz,  
Information Technology Manager

Pulver Kimya defined specific requirements for Partners who have had to implement this solution. The first, existence of international project successful cases, second, support country specific localization according to the local legislation to have ability provide book-keeping and tax accounting. The OntargIT Company matched to these requirements completely. It was proved to be supported international team in several multi-country projects.

The main reason that stands behind our selection of Microsoft Dynamics AX is the power of Microsoft. Microsoft has made our work easier with their office software and by switching to Dynamics AX; we were not supposed to learn any other new user interface. It was the same like Microsoft office tools. Easy user interface really helped us in a positive way in switching.

OntargIT has completed ERP rollout project for Pulver in Ukraine within a month.

- Two legal entities were automated during the project that include following departments: procurement, sales, accounting, warehousing.
- The functional we provided through the project:
  - Vendors' payments and settlements;
  - Cost of goods accounting (including overhead costs from transportation and customs clearance of goods);
  - Customers' payments and settlements (including terms of payment and overdue payments);
  - Warehouse management (minimizing stock, delivery scheduling based on customers' demands);
  - Book-keeping and tax accounting according to Ukrainian legislation.
  - Support supply chain Distributor – Supplier.

The result of the Pulver Kimya project are:

- Transparency and accountability of business in Ukraine.
- CFO can control the material and financial flows online in the same way as in other foreign departments of corporation.
- The data from Ukraine are used for daily (cash flow, analysis of advances to customers, trial balance) and monthly (balance sheet, profits and loss statements) accounting of the Group of companies.
- Active SLA from the solution provider – Ontargit Company.
