

Bikari Khan Pathan

Sr MS Dynamics FO Technical Consultant/Developer

Phone No: +91 6305579766

Email: bikaripathan@gmail.com

Professional Summary:

- 4.3 years of experience in Microsoft Dynamics F&O consulting, specializing in F&O in gathering requirements, designing, developing, and delivering solutions.
- Expertise in Microsoft Dynamics 365 Implementation, Customization, and Integration. Skilled in Model driven app development and integrating with Dynamics 365.
- Led successful customization and configuration of Dynamics 365 FO projects by collaborating with stakeholders, generating Technical design documents, and ensuring alignment with business requirements.
- Proficient in identifying and resolving issues related to Microsoft Dynamics 365 (D365) for both business and technical teams.
- Extend the functionality of Dynamics 365 FO, introducing modern and efficient components that seamlessly integrate with the FO platform.
- Demonstrated expertise in configuring Business units, Security modules, and integrating Dynamics 365 with Azure Active Directory, ensuring data security and consistency.
- Proficient in leveraging XML for Dynamics 365 customizations, data integration, workflow automation, and report/dashboard customization, enhancing overall system functionality.
- Managed end-to-end SDLC processes using Safe Agile methodologies, overseeing production deployment, issue tracking, and requirement gathering. Translated intricate business requirements into actionable technical solutions, optimizing user interactions through Model-driven apps and fostering cross-functional collaboration.
- Strong commitment to collaborating with cross-functional teams, gathering requirements, and translating business needs into innovative technical solutions that optimize user interactions and achieve organizational goals. Implemented plug-ins, custom workflows, and console apps using C#, extending system capabilities, and ensuring data accuracy.
- Designed and deployed Azure Logic Apps, seamlessly integrating with Dynamics 365 FO entities.
- Leveraged Microsoft Visual SourceSafe for version control, ensuring code integrity and collaboration.

Technical Skills:

Programming Languages	X++, C Language , Basics of .Net
Cloud Technologies:	Microsoft Azure, Azure VM, Azure SQL
Web services:	REST API.
Integration Technologies	Azure Logic Apps, 3 rd party Integrations.
CI/CD Pipelines	Azure DevOps
Databases:	MS SQL Server 2008/2012/2014

Education: Bachelors in Electrical and Electronics Engineering. JNTUK

Work Experience:

B2B Software Technologies.

September 2020 -- Present

MS Dynamics FO Technical Consultant/Developer

Responsibilities:

- Having hands-on experience in D365 Development, Customizations, and Integrations for Finance and Operations
- Expertise skills in X++ Programming.
- Used Azure Logic apps to implement workflows and Integrated MS Dynamics 365 with Azure Logic Apps

- Management of functional specifications to technical solutions, unit and system test scripts, and deployment plans.
- Real-time Knowledge of Security Roles and Permission structure in D365 F&O.
- Able to estimate, design, customize and develop customer specific requirements.
- Implemented multiple logic app to send data to 3rd party Application like events notification, sync the get notification, and data collection.

Projects:

Project: Al-ghurair.

Role: Sr MS Dynamics FO Developer

Responsibilities:

- Created Custom services for 3 party integration, API Integration.
- Create and Manage Security configuration.
- Involved in customizations in all Dynamics 365 for Finance and Operations ERP module implementation like AP,AR, SCM,WM and Product information management etc.
- Developed form design patterns, Creating Wizard forms
- Run Base forms, creating dialog Run base forms
- Worked with tools such Azure Devops for project management, source, and version control
- Developed SSRS Reports related to organization based on Client Requirement.
- Managed code check-ins and builds in Azure Devops
- Monitor system performance and recommend optimizations
- Developed all the customizations required for the client without deviating any Microsoft Best Practice standards
- technical support, troubleshoot support requests, identify issue and implement a solution.
- Design and develop Microsoft Dynamics 365 FO based Product.
- Create and maintain technical documentation around existing and new customizations & Resolving bugs raised.

Project: Talking Rain.

Role: Sr MS Dynamics FO Developer

Responsibilities:

- Involved in customizations of various modules including Finance, Supply chain and Production Control Modules.
- Developed SSRS Reports related to organization based on Client Requirement.
- Developed all the customizations required for the client without deviating any Microsoft Best Practice standards
- Provided technical support, troubleshoot support requests, identify issue and implement a solution.
- Design and develop Microsoft Dynamics 365 FO based Product.
- Create and maintain technical documentation around existing and new customizations & Resolving bugs raised.
- Developed Logic apps for Data pushing to 3rd party Applications.

Project: Mammut.

Role: Sr MS Dynamics FO Developer

Responsibilities:

- Create Data entities for custom table and standard table.
- Code optimization done for all customization which effecting the performance
- Using trace parse identified the issue where it's taking time to executing the code and effecting the performance.
- Create and maintain technical documentation around existing and new customizations & Resolving bugs raised.

Project: Shanmukha Agri Tech

Role: MS Dynamics FO Developer

Responsibilities:

- Develop E- Invoice and E-way bill Integration for customer Debit code and Credit code
- Develop E- Invoice and E-way bill Integration for transfer Orders
- Documented TDD's & Resolving bugs raised.

Project: FicusPax Ltd.

Role: MS Dynamics FO Developer

Responsibilities:

- Develop E- Invoice and E-way bill Integration for customer Debit code and Credit code
- Develop E- Invoice and E-way bill Integration for transfer Orders
- Documented TDD's & Resolving bugs raised.

Project: InnoFilms

Role: Jr MS Dynamics FO Developer

Responsibilities:

- Involved in customizations of various modules including Finance, Supply chain and Production Control Modules.
- Develop E- Invoice and E-way bill Integration for customer Debit code and Credit code
- Develop E- Invoice and E-way bill Integration for transfer Orders.
- Developed SSRS Reports related to organization based on Client Requirement.
- Developed all the customizations required for the client without deviating any Microsoft Best Practice standards.
- Provided technical support, troubleshoot support requests, identify issue and implement a solution
- Design and develop Microsoft Dynamics 365 FO based Product.
- Create and maintain technical documentation around existing and new customizations & Resolving bugs raised.
