Work Experience

Project: Screwfix UK – End-to-End Implementation

- Configured and tested the Landed Cost module to allocate additional procurement charges (freight, customs, etc.), enhancing inventory valuation accuracy.
- Designed Vendor Cost Type Groups, Item Cost Type Groups, and Transfer Order Cost Groups to optimize cost management in procurement and logistics.
- Led system configuration and master data setup for Go-Live readiness in a multi-entity D365 environment.
- Acted as a bridge between technical and functional teams, providing inputs for customizations and conducting detailed gap analysis.

Project: NYKAA – Support

- Managed D365 F&O security roles, ensuring accurate access control across Finance, Procurement, and Inventory teams.
- Implemented Warehouse Management for PO Receiving, Put-away, and configured mobile devices for warehouse operations.
- Configured Bank Integration in D365 and coordinated with technical teams for seamless development execution.
- Delivered end-user training and facilitated smooth adoption through detailed documentation and user guides.

Project: Kaff Appliances – Support

- Resolved issues in Procurement, Inventory, and Sales modules, ensuring uninterrupted daily operations.
- Conducted data import/export using the Data Management workspace and participated in UAT cycles.
- Collaborated in documentation of FDDs and created user manuals to support process rollouts.
